

BPC-157

BPC-157, composed of 15 amino acids, is a partial sequence of body protection compound (BPC) that is discovered in and isolated from human gastric juice. Experimentally, it has been demonstrated to accelerate the healing of many different wounds, including tendons, muscles, nervous system and superior healing of damaged ligaments. Those who suffer from discomfort due to muscle sprains, tears and damage may benefit from treatment with this peptide. It can also help aid skin burns to heal at a faster rate and increase blood flow to damaged tissues.

Content & Potency: 2mg/ml subcutaneous injection provided in a 5ml vial

Suggested Dosage: Inject 0.15 ml (300 mcg) subcutaneously daily for 30 days.

*****Do not flush unused medications or pour down a sink or drain. *****
